
Scientific and Technical Council

For improvement of technology and a unified technology policy in development, design, construction, retrofitting, and operation of power grid facilities, JSC IDGC of the North-West has a Research and Technology Board (hereinafter referred to as RTB). RTB is a standing collegial advisory body on research and technology functions and development of the Company.

RTB operates pursuant to the Regulations on the Research and Technology Board of the Company. The Regulations on the Research and Technology Board of the Company and its membership were adopted by the Order of JSC IDGC of the North-West dated 06.02.2014 No. 54.

In 2014, delegates of electric equipment manufacturers and service providers participated in the work of RTB of JSC IDGC of the North-West as guest experts.

In 2014, technology boards headed by the Chief Engineers of the branches were active at all the branches of JSC IDGC of the North-West.
